## SUMMARY

Passionate software engineer with a background in game development, complemented by a rich set of technical skills including Python, JavaScript, and Unreal Engine. Recognized in multiple design competitions, I am eager to contribute to innovative tech solutions and enhance user experiences. I am thrilled to apply my creativity and technical expertise to play a part in impactful projects that align with my skills.

## EDUCATION

### B.C.S Game & Simulation Development

Albright College

📅 2023 - 2027

## KEY ACHIEVEMENTS

#### Engineer For The Week 2022

I submitted 3D models that were a work in progress for an animated film I was participating in and awarded first place for my design.

#### Marvel Character Design Competition 2023

I was assigned to create a character that was going to be judged by an artist that works at Marvel Studios. I placed third in the entire competition and got to learn from professionals in the industry.

#### Berks County High School Media and Design Competition 2022

I was a 3D modeler and editor for a team making an animated short video. We won first place in the county and progressed to the finals.

#### Dean's List

I was recognized by Albright College for managing my straight A's during my first and second semesters.

#### PA High School Media and Design Competition 2022

My team and I placed 2nd place in the state competition for our 3D animated short video from the county competition.
